Disk: GAMES.PM

Various games. The ones ending in .BS require you to load BASIC from a system disk first, then within BASIC, type LOAD <2<HANGMAN.BS (for example). Alternatively, you can just type <2<HANGMAN.BS at the Exec (\$) prompt, and it will automatically load BASIC from the current system disk before loading the program.

To end a BASIC program, press Ctrl-Y (if the program is running) then type BYE and press Enter.

```

Disk: LASA.PM

Source and executable program to set the Load Address (La) and Start Address (Sa) of a file on a Poly disk.

Command format: LASA filename nnnn mmmm

nnnn = load address in hex

mmmm = start address in hex

Disk LASA has 2 files on it.

15 sectors in use, 0 deleted, 174 sectors free.

Size	Addr	La	Sa	Name
9	4	0	0	LASA-SRC.TX
2	D	3200	3200	LASA.GO

Disk: SM.PM

Version 3.4 of Bob Bybee's Smartmodem communications program.

See version 3.6 for the final version.

Disk SM 3.4 has 3 files on it.

195 sectors in use, 0 deleted, 0 sectors free.

Size	Addr	La	Sa	Name
161	4	0	0	SM-INFO.TX
29	A5	3200	3200	SM.GO
1	C2	0	0	sm.DT

Disk: SM36.PM

Final version of Bob Bybee's Smartmodem communications program.
Since the emulator won't be talking to a serial port, this is probably not of interest anymore.

```
Disk SM 3.6 has      3 files on it.
208 sectors in use,      0 deleted,      0 sectors free.
Size Addr   La   Sa Name

Disk: WORM.PM

Bootable disk that plays the “Worm” game. Like many games running in emulators, this one has some timing problems and would need some additional work to make it look good. It looked better on a real Poly.

```
Disk Worm has      23 files on it.  
 260 sectors in use,      0 deleted,      0 sectors free.

The following disks, with names ending in “DOM”, were the Disk-of-the-Month offerings from the PolyLetter newsletter. On each disk is a file named READ-THIS.TX which can be typed to the screen using the T (type) command, as: T READ-THIS.TX

More information on these disks can be found in the corresponding editions of PolyLetter, on the DERAMP website at <https://deramp.com/polymorphic-computers/polyletter.html>
